Its highest-level APIs, C++ and Visual LISP are actually similar. However, the AutoLISP plugin is limited to .acad files and files created by AutoLISP. The standard command-line interface in AutoCAD is known as the Command Window. Autodesk used to provide a separate CAD API application programming interface for its AutoCAD and Civil 3D products called ACAAIA. This is now discontinued and replaced with the C++ API available in AutoCAD, Visual LISP, and Visual Studio. The product of the former Civil 3D Office Suite family was renamed to Autodesk Design Suite in May 2014.

ObjectARX was created as a framework that allowed application to interact with AutoCAD objects, to create objects, manipulate objects, and to create complex scripts that directly manipulate AutoCAD objects. The Autodesk

Exchange Apps marketplace includes "more than 1500 AutoCAD applications" developed to integrate with AutoCAD software. In April 2017, Autodesk announced the release of AutoCAD Model Derivative ("MCAD") which will extend the capabilities of previous file formats, such as DGN, DWG, and DXF, by allowing them to describe multi-model geometry. As of 2017, Autodesk offers Model Derivative as a subscription service, with a limit of five models per workstation. Subscribers receive an ongoing monthly fee and benefit from special discounts. Developer support AutoCAD, AutoCAD LT, and AutoCAD 360 are supported by a community of volunteer developers. Autodesk provides tutorials, community forums and a Community Wiki for online support, while AutoCAD University offers classes on AutoCAD and other Autodesk applications.
